

LOB-Chartered Best Practices Study

Oversight Comparisons

Presentation to the ISM Conference
Albuquerque, NM
May 7-8, 2002

Robin Wendt, EH&S Deputy
Berkeley Lab
510-486-6012

Simplified and Unified Oversight Could Take Process Even Further

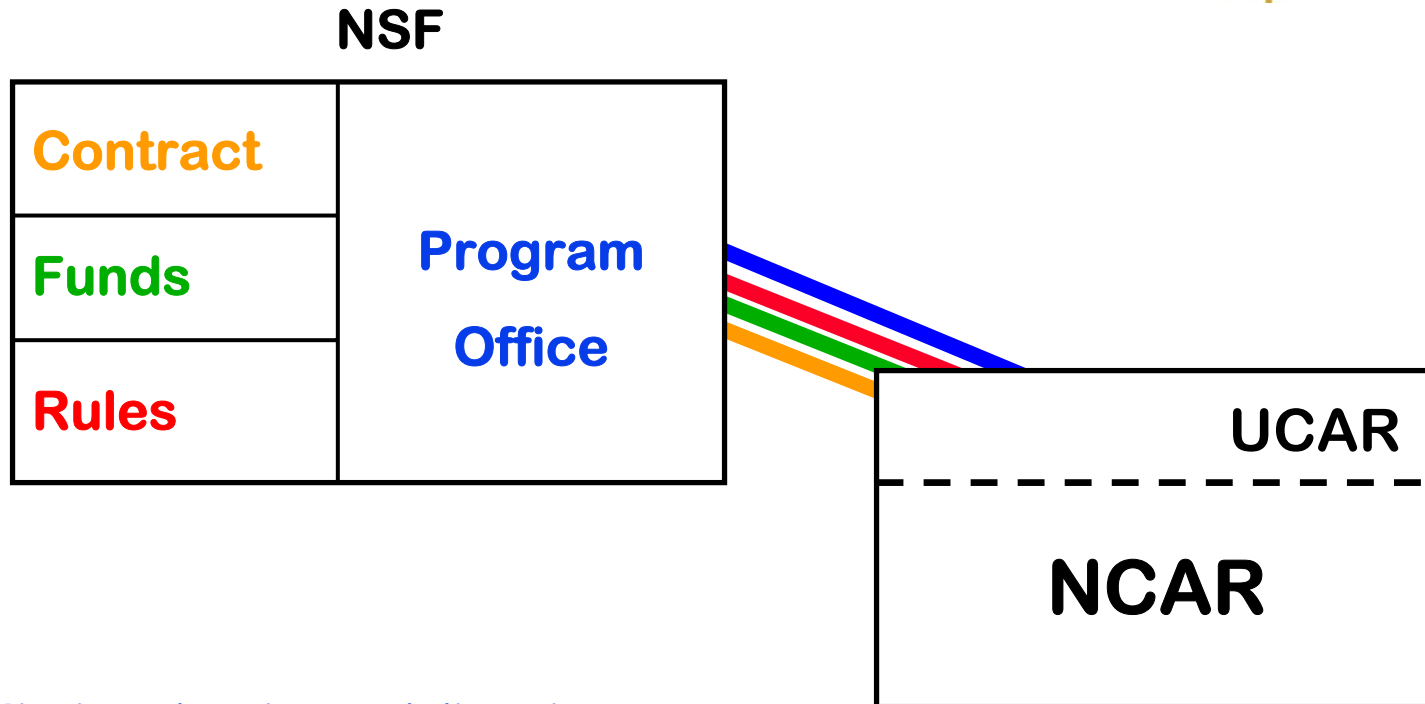

**LBNL Best Practice Study (chartered by
Lab Operations Board) shows that**

- **Simplified and unified oversight**
- **Greater reliance on contractor's ES&H programs and S/A**
- **And more focus on performance results**

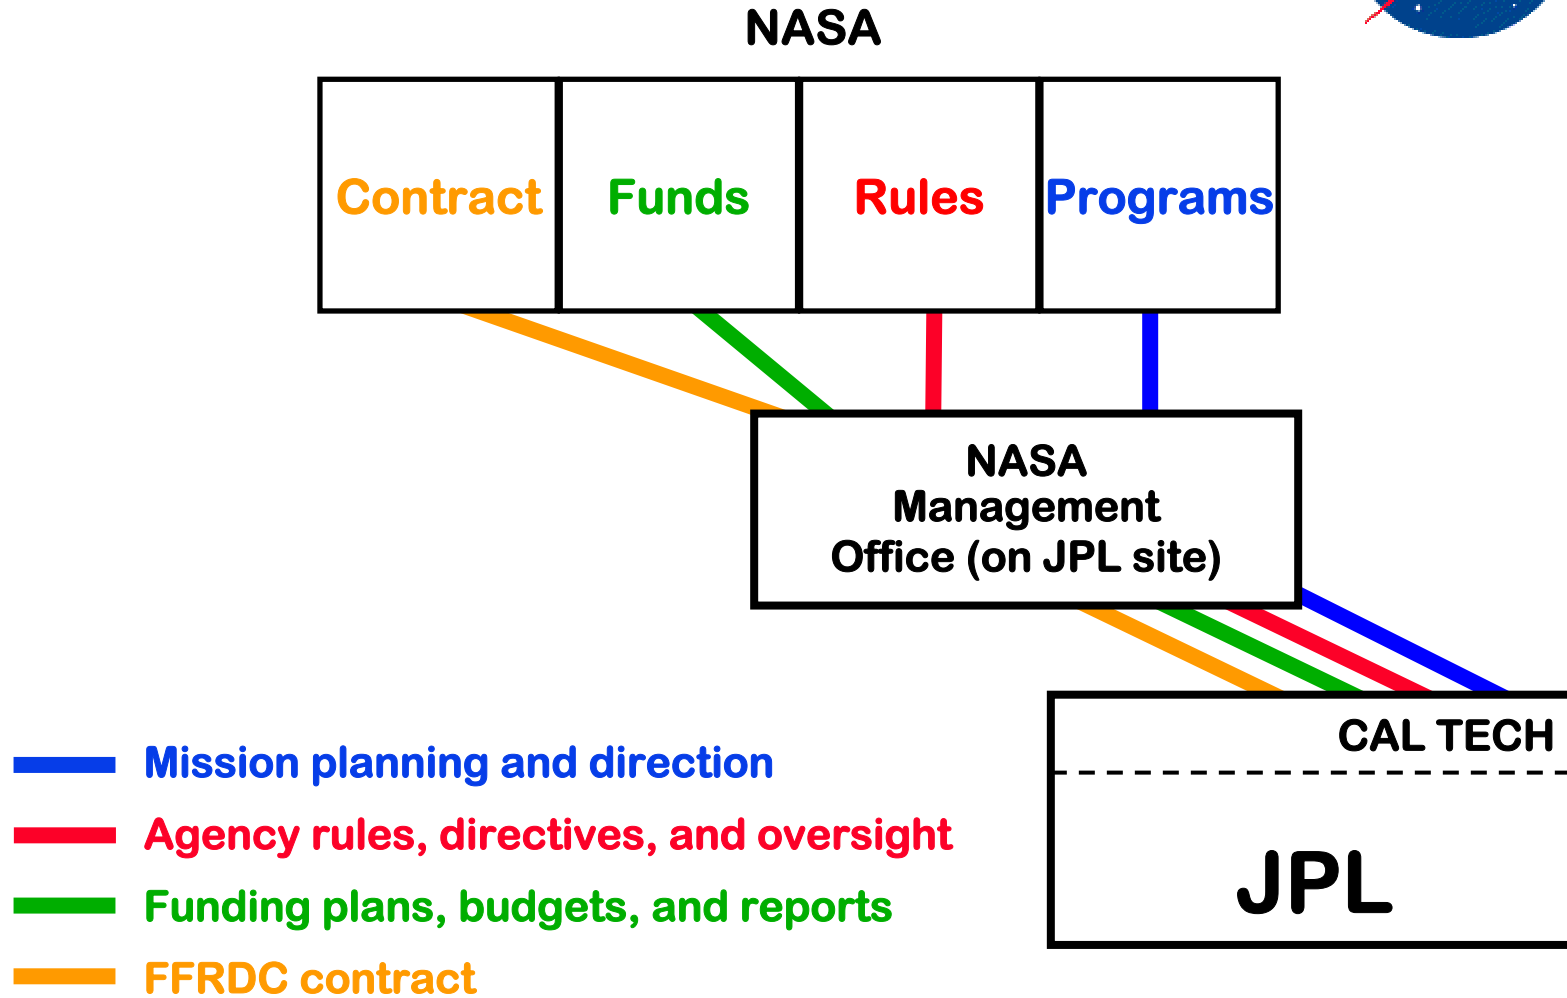

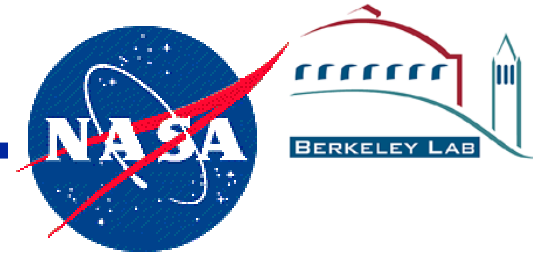

...make good business sense

NCAR – NSF Relationship

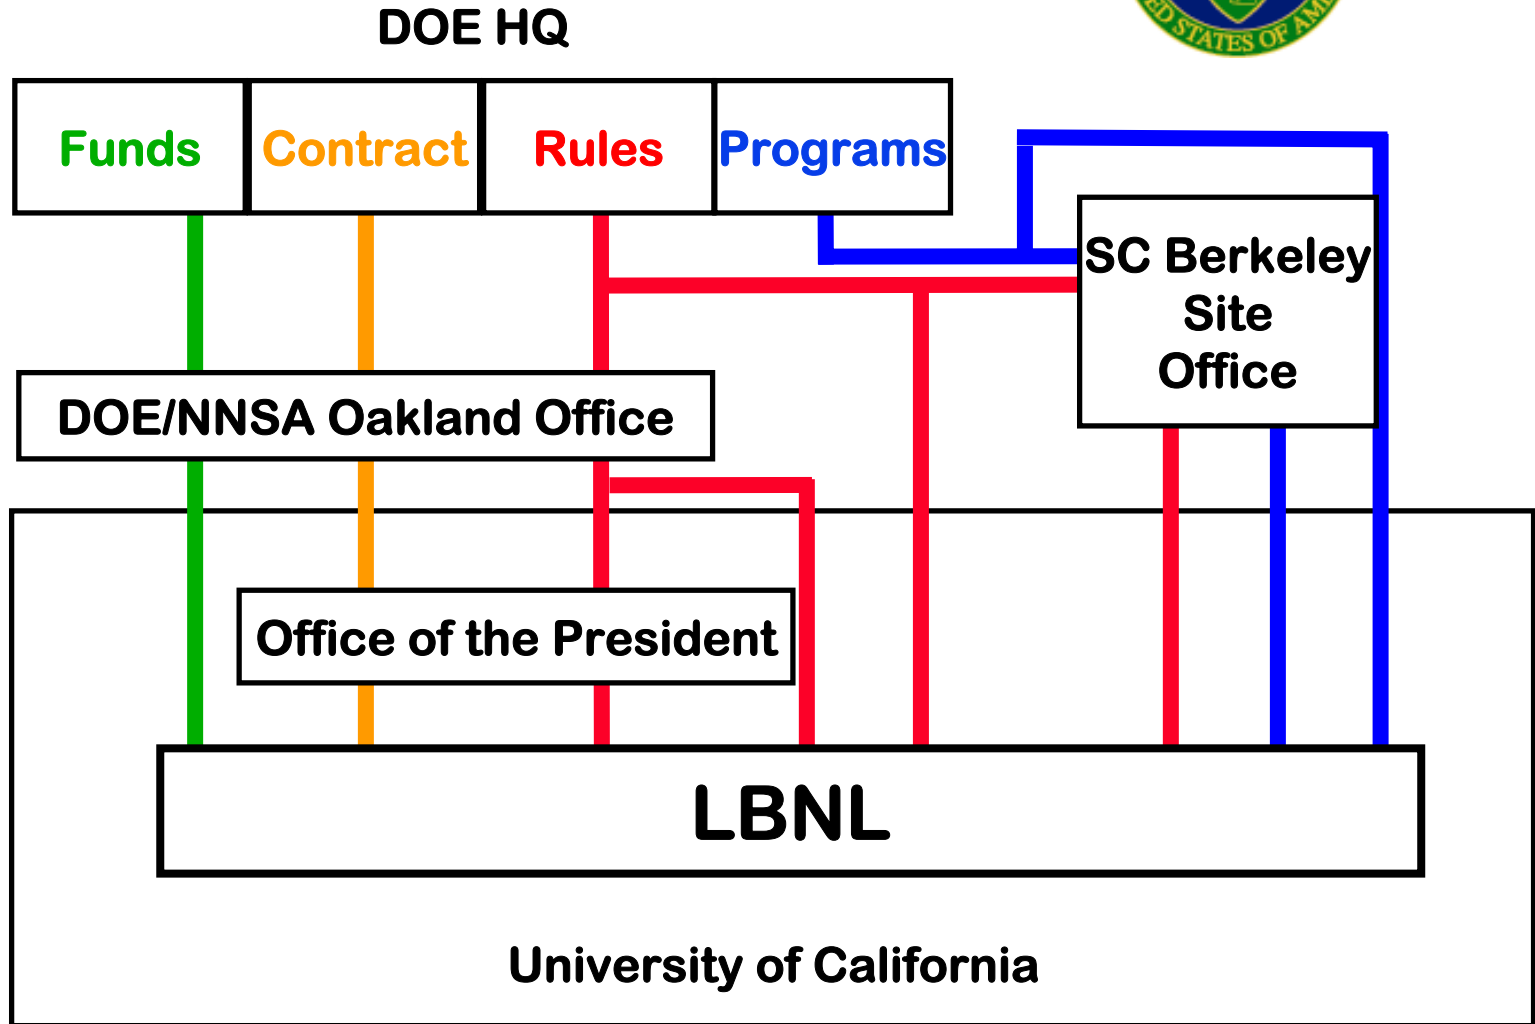

- Mission planning and direction**
- Agency rules, directives, and oversight**
- Funding plans, budgets, and reports**
- FFRDC contract**

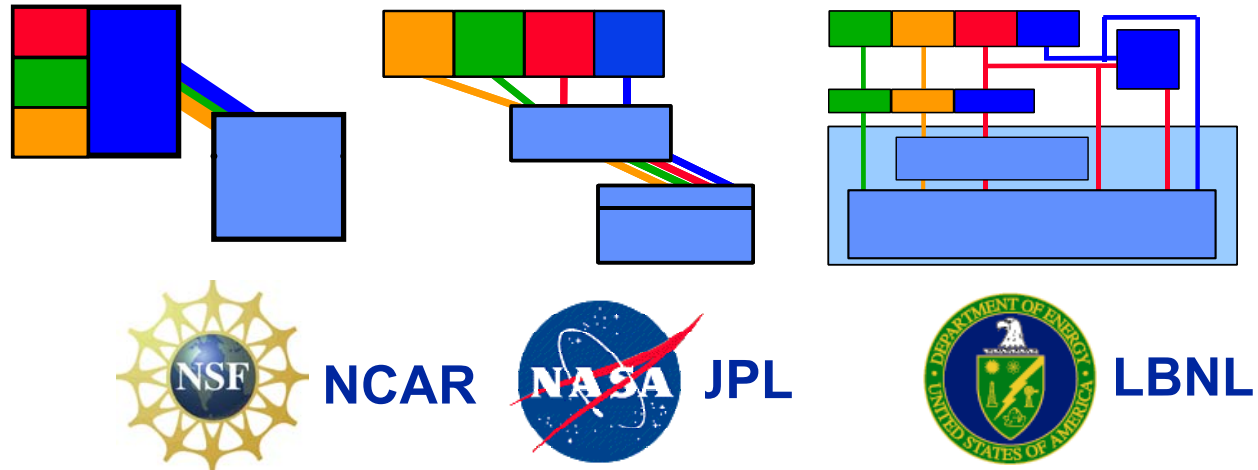

JPL – NASA Relationship

LBNL – DOE Relationship

ES&H Program Comparison

Lab ES&H Staff	2.75	40	41
Lab Population	1,290	5,200	3,830
FTEs per 1,000	2.1	7.7	10.7

Challenge – Simplified, Unified Oversight

- **Best practices study shows costs of multiple channels, layers**
- **Can DOE support a field office as the sole ES&H overseer?**

Leaner ES&H Organizations Will Help Make Us More Competitive

- **Within the DOE complex**
- **As importantly to Berkeley Lab**
 - » **Running National User Facilities**
 - » **Growing “work for others” programs**
 - » **Private sector collaborations**
